# Dear Esteemed Subscriber,

“The world keeps changing” .....that’s as much a cliché as it is a fact. What was in trend yesterday, today is old news; especially in an era defined by rapid technological advancement and transformative economic landscapes.

At the forefront of today’s advancement is the advent of artificial intelligence and rapid machine learning which is the core element and major driving force behind what we present to you, with the vision and unwavering commitment to redefining the way you engage with the cryptocurrency trading market.

The cryptocurrency revolution is not merely a fleeting trend; it represents a profound shift in how we perceive assets, investment strategies, and the very concept of wealth. Dextro AI trading Bot was therefore created to not only simplify cryptocurrency trading, but to also maximise its ever growing potential to create and guaranty a stable financial future for you and generations to come.

Dextro Bot was created by some of the brightest and innovative minds in software engineering and trading strategy. With sophisticated algorithms and innovative strategies; our Bot is designed to maximize your trading potential, delivering results even in tricky and unpredictable market conditions.

For so long the concept of cryptocurrency trading has been labelled as dubious, highly volatile and grossly unpredictable, and with valid reason. However, with an average trade accuracy of 77%, we guaranty you our Bot would get it more times than not while also keeping you in total control of your profit and loss margins in equal measure. The proof they say is always in the pudding.

Therefore, we invite you to embrace this paradigm shift in finance, confident that Dextro AI Trading Bot will serve as your trusted partner on this lifelong adventure to financial success.

Warm Regards,

**DextroBot Team.**

# What is Dextro Bot?

## Our Background and full insight:

Dextro Bot is an artificial intelligence, AI, driven cryptocurrency trading Bot that utilises advanced application programming interface to search relevant trading pairs and execute timely trades with robotic precision whilst making hyper-speed adjustments when required to ensure negative trades are negated to the barest minimum. So, unlike your traditional trading Bots,

Dextro Bot has the added feature of market-learning and making adjustments when required which is essential in a volatile environment like in cryptocurrency.

It's not entirely clear when cryptocurrency trading Bots in general were invented as there's no single moment in history that documents the invention of cryptocurrency trading Bots. However, it's widely understood that they emerged from the history of general algorithmic trading which began around the 1970s with the advent of the first computer-assisted trading when the New York Stock Exchange (NYSE) launched electronic trading systems like the Designated Order Turnaround (DOT), which allowed traders to send orders electronically. Its application has ever since evolved up until the appearance of cryptocurrency-dedicated trading Bots which surfaced after the rise of cryptocurrency markets in the mid-to-late 2010s.

# What is Dextro Bot?

Our Background and full insight

DextroBot was originally created in 2021, following COVID, as a personal trading tool for a Martingale mechanism-based trading. Though promising and sometimes efficient in its execution, its method was raw, with basic mechanisms and limitations of traditional cryptographic algorithms.

This meant that its usage was highly volatile and unpredictable making it capable of high profit and high loss without clear checks and control. These flaws meant the possibility of AI integration was explored given the current implementation of artificial intelligence in virtually every work of life.

The raw mechanism was then further refined by blockchain experts and advanced programmers, who were able to make tremendous adjustments to improve on the once-upon-a-time very raw tool to a properly refined, well improved trading machine which has so far taken the industry by storm.

Dextro AI Trading Bot operates under a legal entity as "Dextro AI LTD", proudly incorporated and registered under the UK Companies House with **Company Number: 16808091**

This provides a strong foundation of corporate governance and transparency.

Furthermore, our BVI company registration under their FSC as well as getting our FRN under the Financial Conduct Authority are currently ongoing, reflecting our commitment to global operations and robust regulatory frameworks as we expand globally.

## Mission Statement

Dextro AI is built to deliver precise, reliable, and fully automated cryptocurrency trading performance through advanced artificial intelligence.

Our mission is to provide traders and institutions with a sophisticated, data-driven system capable of analysing markets, identifying profitable opportunities, and executing trades with exceptional accuracy and speed.

## Vision Statement

To be the global leader and most trusted platform in automated crypto trading, recognized for revolutionizing financial accessibility through continuously adaptive AI technology.

We envision a future where sophisticated, 24/7 algorithmic trading is the standard, enabling individuals everywhere to secure and grow their digital wealth effortlessly, regardless of age, level of education, location or social status.

# What are our Core Values?

An insight into what drives us as an organisation:

## Collaboration:

Ours was built on a collective spirit to bring the brightest minds to create something spectacular, for that reason we don't just see our subscribers as customers, but as partners in growth and success.

## Innovation:

We're constantly pushing boundaries to deliver unparalleled trading solutions and ideas.

## Integrity:

We always seek to uphold transparency and security in all our operations, ensuring your trust and confidence.

## Excellence:

We strive for the highest standards in technology, service, and user experience, making us available to everyone and anyone.

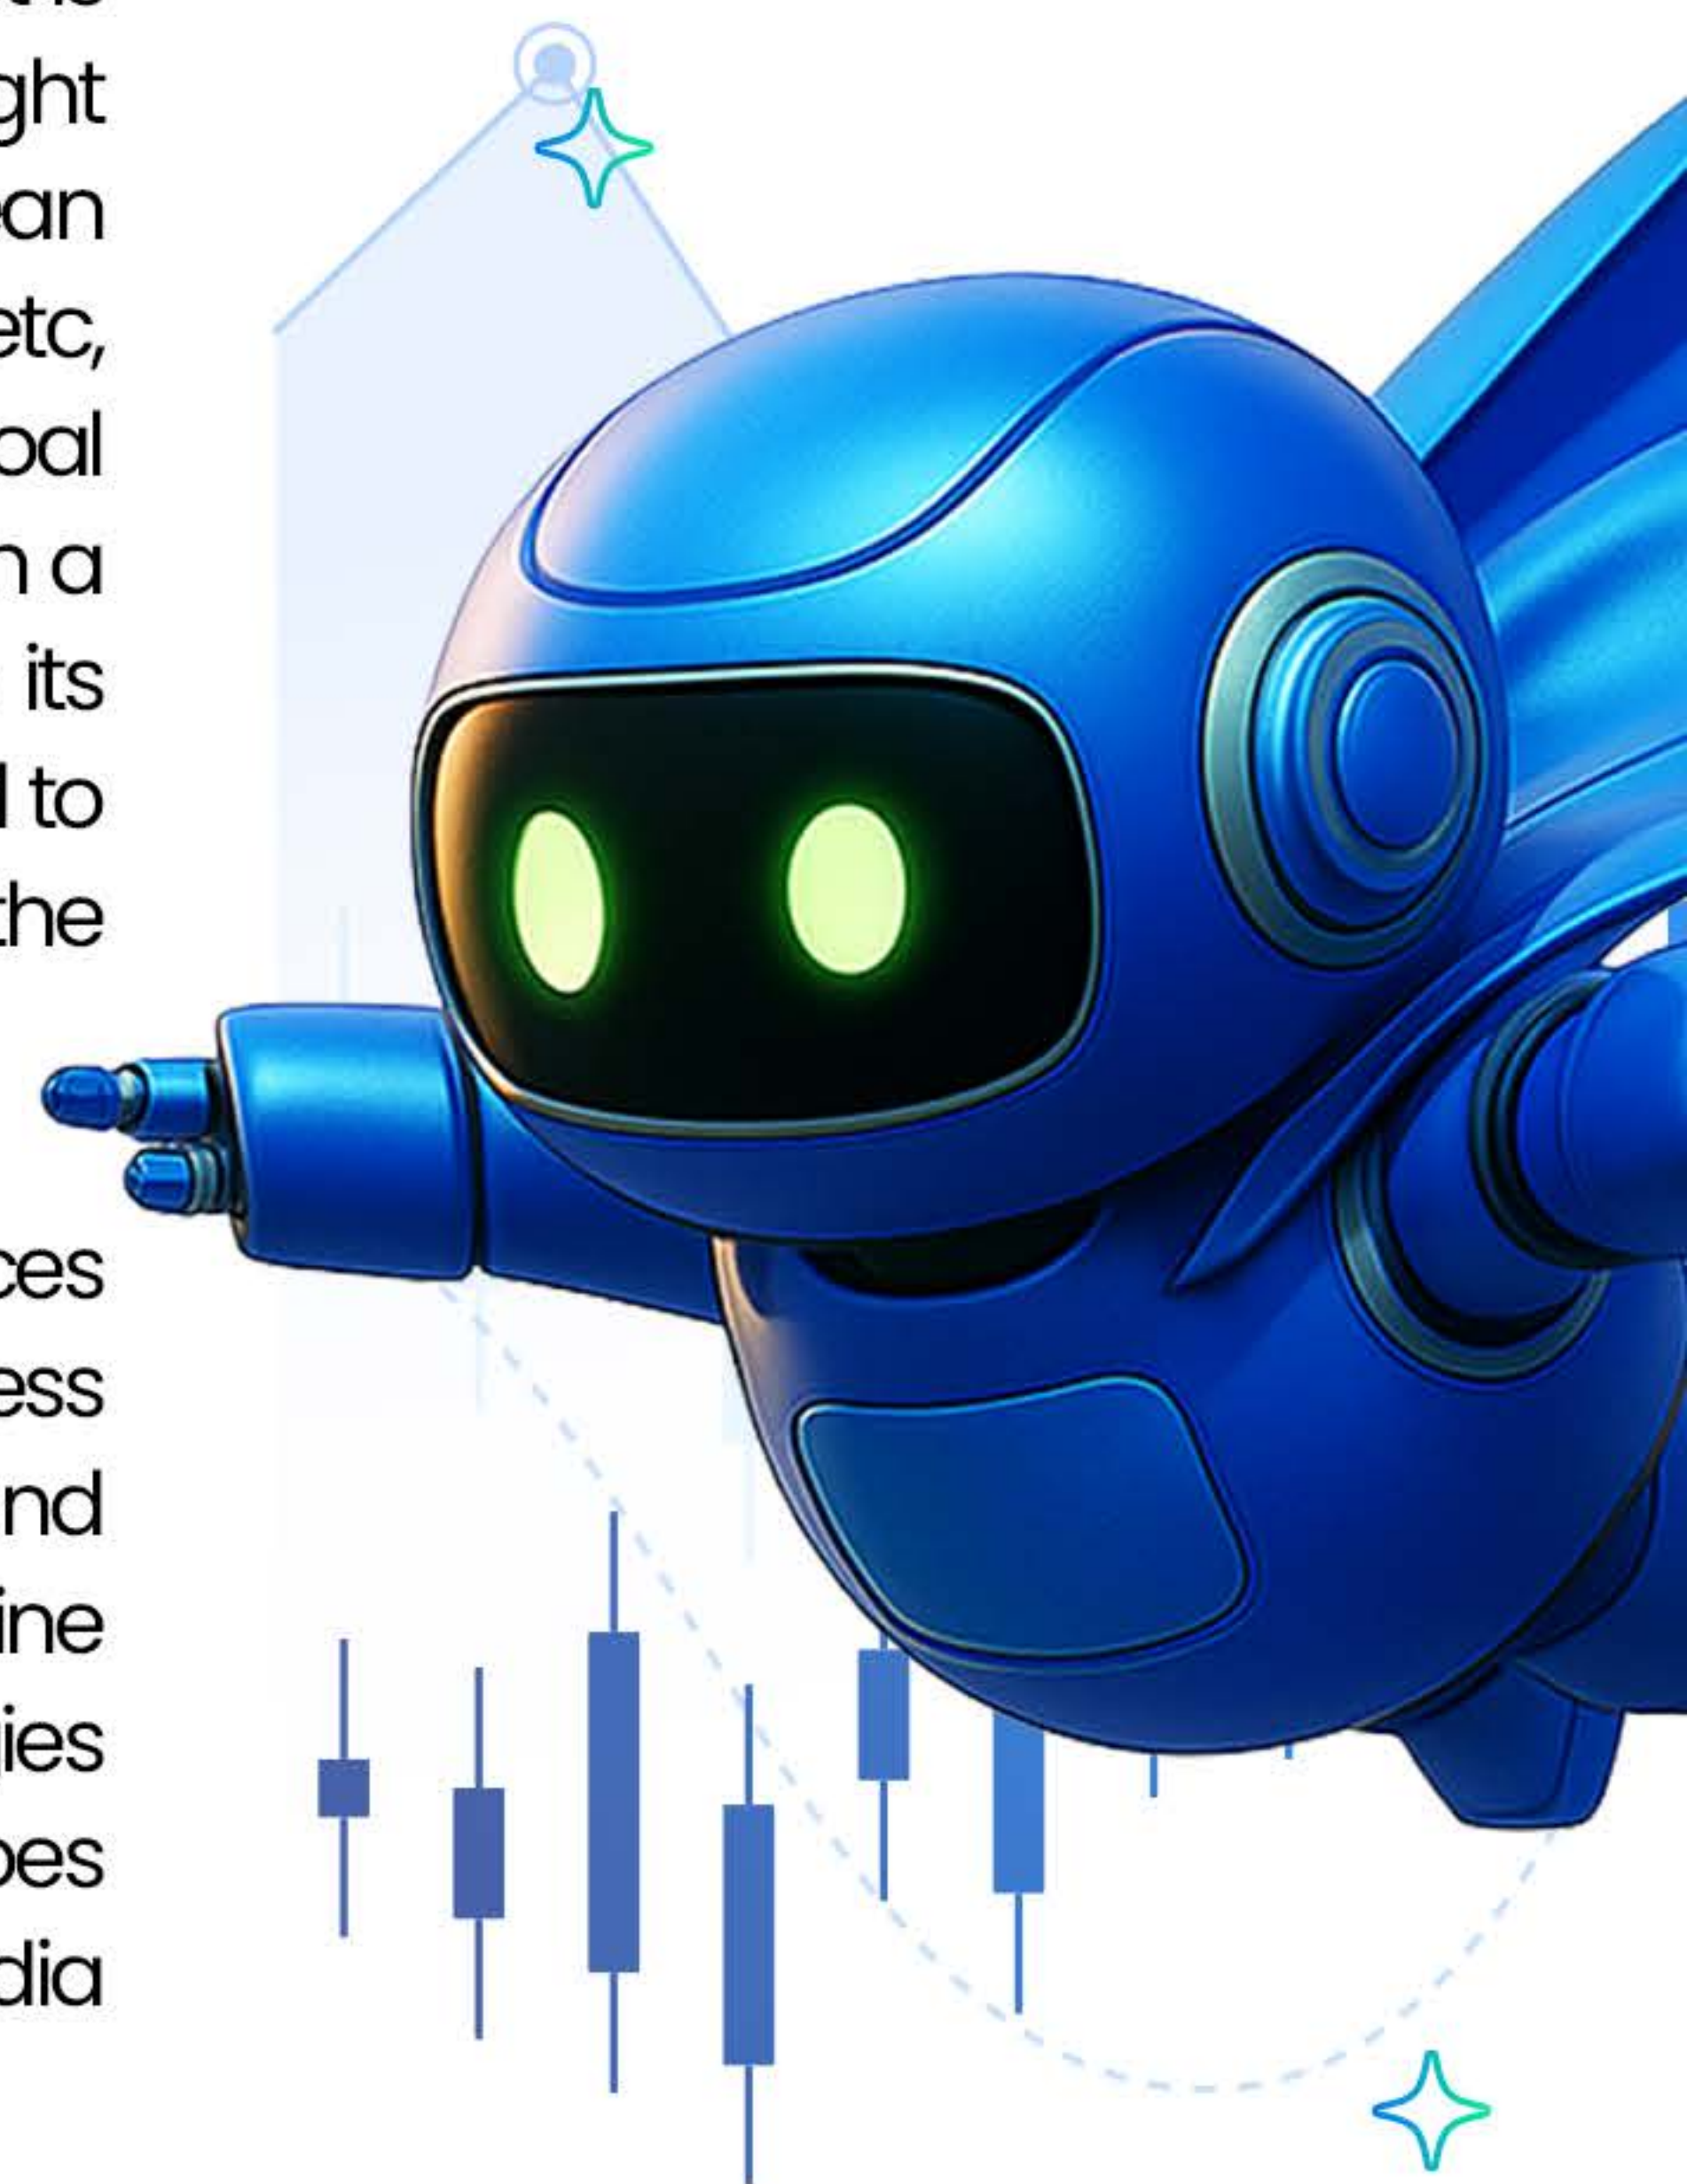

# How does Dextro Bot function?

## Understanding the Dextro Bot trading Mechanism:

Regular trading Bots have pretty similar capabilities and strategies regardless of if the market is in stocks, FOREX or cryptocurrencies. A trading Bot at the basic level can utilise one or a slight combination of several strategies to deliver results. A regular Bot can trade using a mean reversion strategy, grid trading strategy, market making, arbitrage, trend-following strategy etc, with most utilising the Martingale method of doubling the trade size after each loss with the goal of recovering all previous losses plus profit on next positive trade which when combined with a mean reversion strategy, which is an idea that an asset price would eventually return to its historical average after a significant deviation, can bring tremendous profit but can also lead to rapid, catastrophic losses, making regular trading Bots hugely risky in a sector as volatile as the cryptocurrency market.

Dextro AI Trading Bot on the other hand utilizes advanced Application Programming Interfaces (APIs) to produce trading profit with hypermodern algorithm-driven strategy and emotionless execution. Our AI continuously monitors the market, executing trades with incredible speed and accuracy. At its core, Dextro Bot utilises high-frequency trading (HFT) strategies and machine learning to analyse market data, predict future price changes and continually adapt strategies to get the better of the market. This strategy is highly hypermodern in the sense that it goes beyond fixed rules but rather learns from market actions whilst also incorporating social media sentiment and major governance policies.

## How does Dextro Bot function?

Understanding the Dextro Bot trading Mechanism:

The high-frequency trading method utilised by Dextro Bot is a highly sophisticated and technical approach where Bots execute a massive number of orders in a fraction of a second, capitalising on tiny price differences and low-latency infrastructure to gain a competitive edge in the market. While the volatile nature of the cryptocurrency market means not every single trade guarantees profit, Dextro Bot possesses the added advantage of making quick, adaptive adjustments to negate the cause of negative fluctuations and efficiently return to positive profit yields.

Now in its 3rd generation, Dextro Bot is well placed to lead the industry in speed and execution, posting accuracy levels of 50-60% + during adverse market conditions and 80-90% + when the market is pretty good and smooth sailing. This averages a 70% + trade accuracy, giving you a tremendous advantage compared to other trading Bots.

# What about the risks and losses?

Explaining the pain behind the beauty:

Just like every other automated trading system, there are risks abound with using Dextro Bot, and in our true fashion of promising transparency, we intend to keep you aware of the risks involved with trading with Dextro Bot.

The major risks abound involves the trading profit which is by no means guaranteed and is hugely dependent on Bot performance and market trend.

To this regard, profit margin would change from day to day with a set maximum and minimum profit margin depending on type of Bot purchased.

In a similar fashion, Dextro Bot has an industry-leading strategy to minimise loss by implementing a loss cap that ensures it also falls within the margin of the profit cap.

For instance, if subscribed to a Bot that offers a 0.5–1% daily profit, the maximum loss that can be incurred daily would be 1%, with the minimum loss set at 0.5%.

This would be taken off your traded profit, and in a case where your traded profit is less than the loss amount, the loss would be taken out of your trading capital. Otherwise, trading capital would remain unchanged and guaranteed for the duration of the Bot trading cycle, which is usually 6–12 months depending on the Bot subscription.

## What about the risks and losses?

Explaining the pain behind the beauty:

We finally also adopt a non-compounding trading method which helps reduce losses by better securing capital loss as a compounding trading method ensures all funds are utilised in trades, which can lead to huge profit, but also ensures more losses when losses occur. But by keeping trading capital fixed, losses are only taken from the profit count.

# Do I get a certain level of control & transparency?

**Giving you full insight into the mind of our trading Bot:**

✦ Unlike most other passive trading platforms, Dextro Bot empowers you with control. You can pause trading activities for a set period if you identify market conditions as overly volatile, and trading can be resumed at will. This is especially important in a case where there are consecutive trading days with losses. By pausing the Bot, you incur zero loss of funds, however, when the market improves and Bot performance goes into the positive, you would need to resume Bot trades for your account to resume getting profits.

Our commitment to transparency means that all trading results are automatically uploaded to your personal dashboard in real time, allowing you to clearly monitor and verify not only your Bot performance, but also the performance of all Bots across the Dextro Bot cloud network. This helps provide insights on when general Bot performance for all subscribers. Please note that the general Bot performance would not always determine if your individual Bot would yield profit, as the algorithms are slightly different for each Bot type, so by monitoring your profit margin, you should get a good idea of whether your Bot is registering profits or losses. We however guarantee to keep Bot performance for all accounts at an optimum level to ensure it falls within our acceptable average profit accuracy.

When pausing Bots, please note that profit posting would resume on that account at the end of the next trading day once the Bot is left inactive until past midnight (GMT) of the day of the trade resumption.

Dextro Bot employs an advanced AI system capable of completing between 100-1000 trades in just 5 minutes, adapting to market fluctuations and trading volumes. This number will likely increase as the demand on our servers increases.

Trades occur every second of the day from Mondays to Fridays. Weekends are dedicated to mainframe systems and server updates, upgrades, bug fixes, or resets; to preparing for the next 5-day trading cycle.

## Understanding the Trading Cycle

Trades are carried out from our central server which controls each subscribers' individual trading Bots with profits dispersed to individual accounts daily based on your chosen Bot.

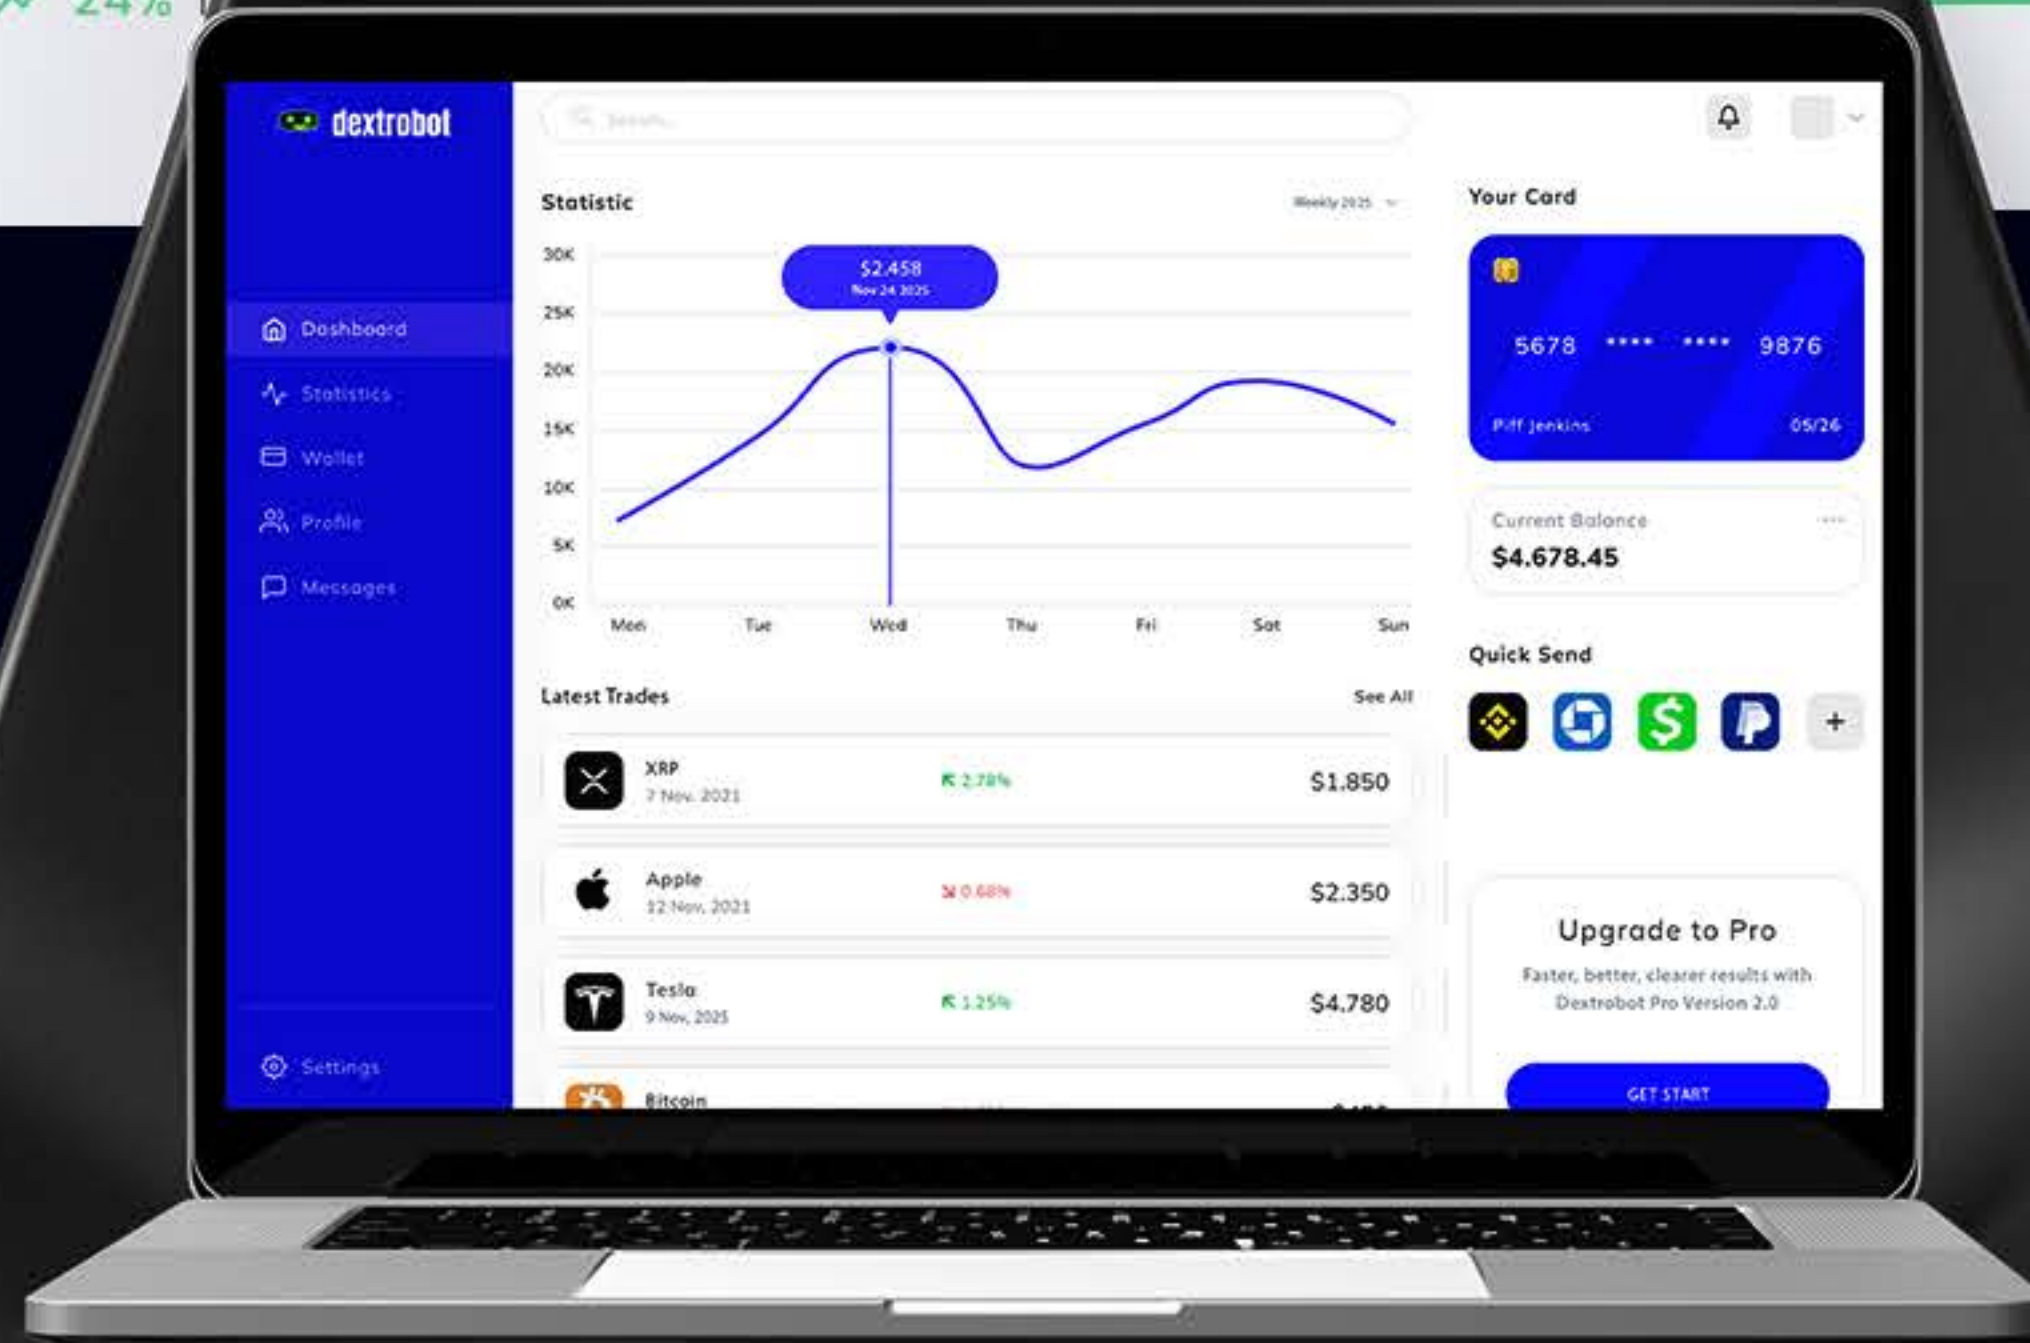

# Understanding Your Dashboard Trading Results

 **\$864**  
~ 24% ↑

 **\$3865.29**  
~ 35% ↑ This Week

 **\$365.2**  
~ 13% ↓ This Week

 **\$9865.68**  
~ 33% ↓ This Week

# Understanding Your Dashboard Trading Results

Your trading results page provides comprehensive details, including system-generated transaction references for verification, trade type, trading pair, opening/closing amounts and times, profit/loss, commission, and applicable taxes. These figures help you ensure your Bot is active and connected to our central server. If you notice no figures during trading hours, please contact our support team immediately, as an undetected malfunction could impact your daily profit.

It is imperative that you are responsible to ensure your Bot is trading actively as your Bot malfunction might not always be detected by the central server responsible for trading profit dispensation.

Kindly note that trading results are not published during weekends and only on weekdays. So, no new trading results would be available to view on a weekend. Trades occur on weekdays with a GMT time correspondence with an hour difference as might happen during daylight saving periods.

All transactions on our trading result page are all verifiable on the blockchain network, this ensures that each trade displayed on your dashboard actually occurred and not merely the system generating random figures for the sake of it. This fosters confidence in the fact that our Bot is delivering legitimate, verifiable data and results. There might be slight differences in the time the trade is initiated and executed on the blockchain network and on our trading result page, and this is mainly due to the fact that our system records started and executed trades, and can only display the trade on the result page after the trade is closed. There might be a delay in start and end times, cause of when our algorithm captures the concluded result; and given there are millions of trades happening by the second on the blockchain network, and our Bot can only capture them on the database only in a few hundred at a time, there would inevitably be delays in time of execution and display. This applies for all trades regardless of if it's a profit (positive) trade or loss (negative trade) trade.

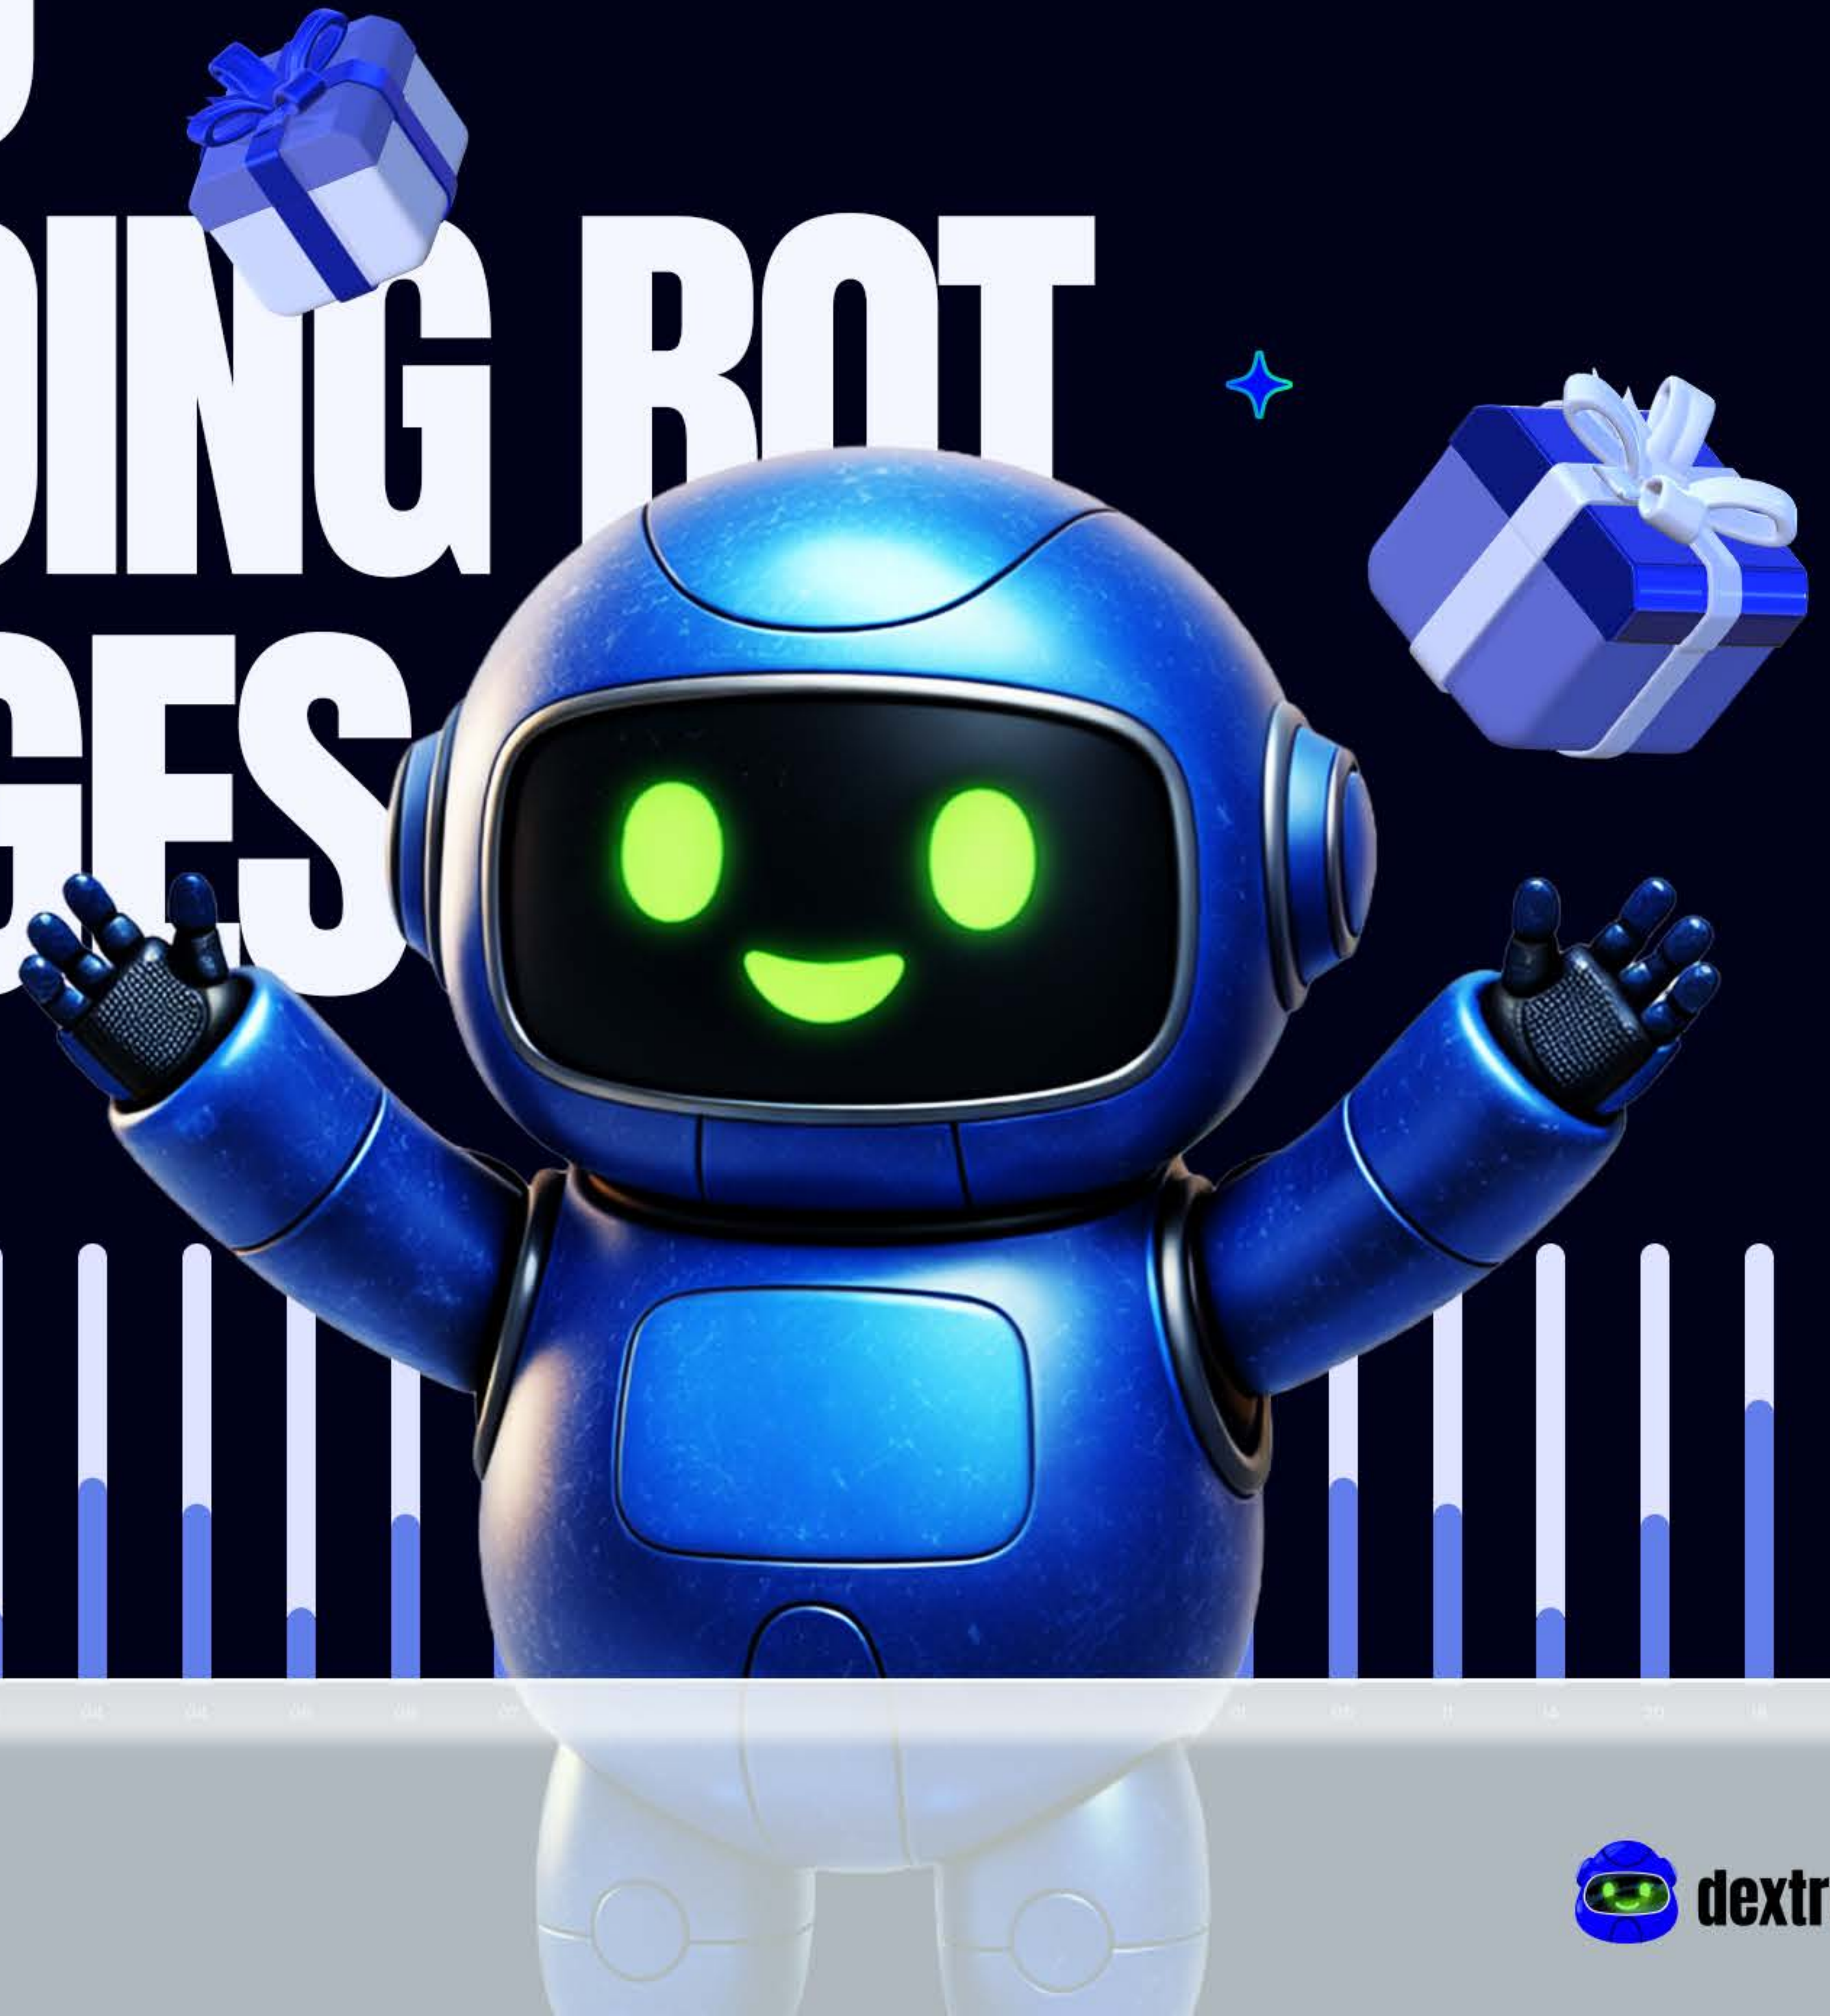

Contact our support team if further understanding is required.

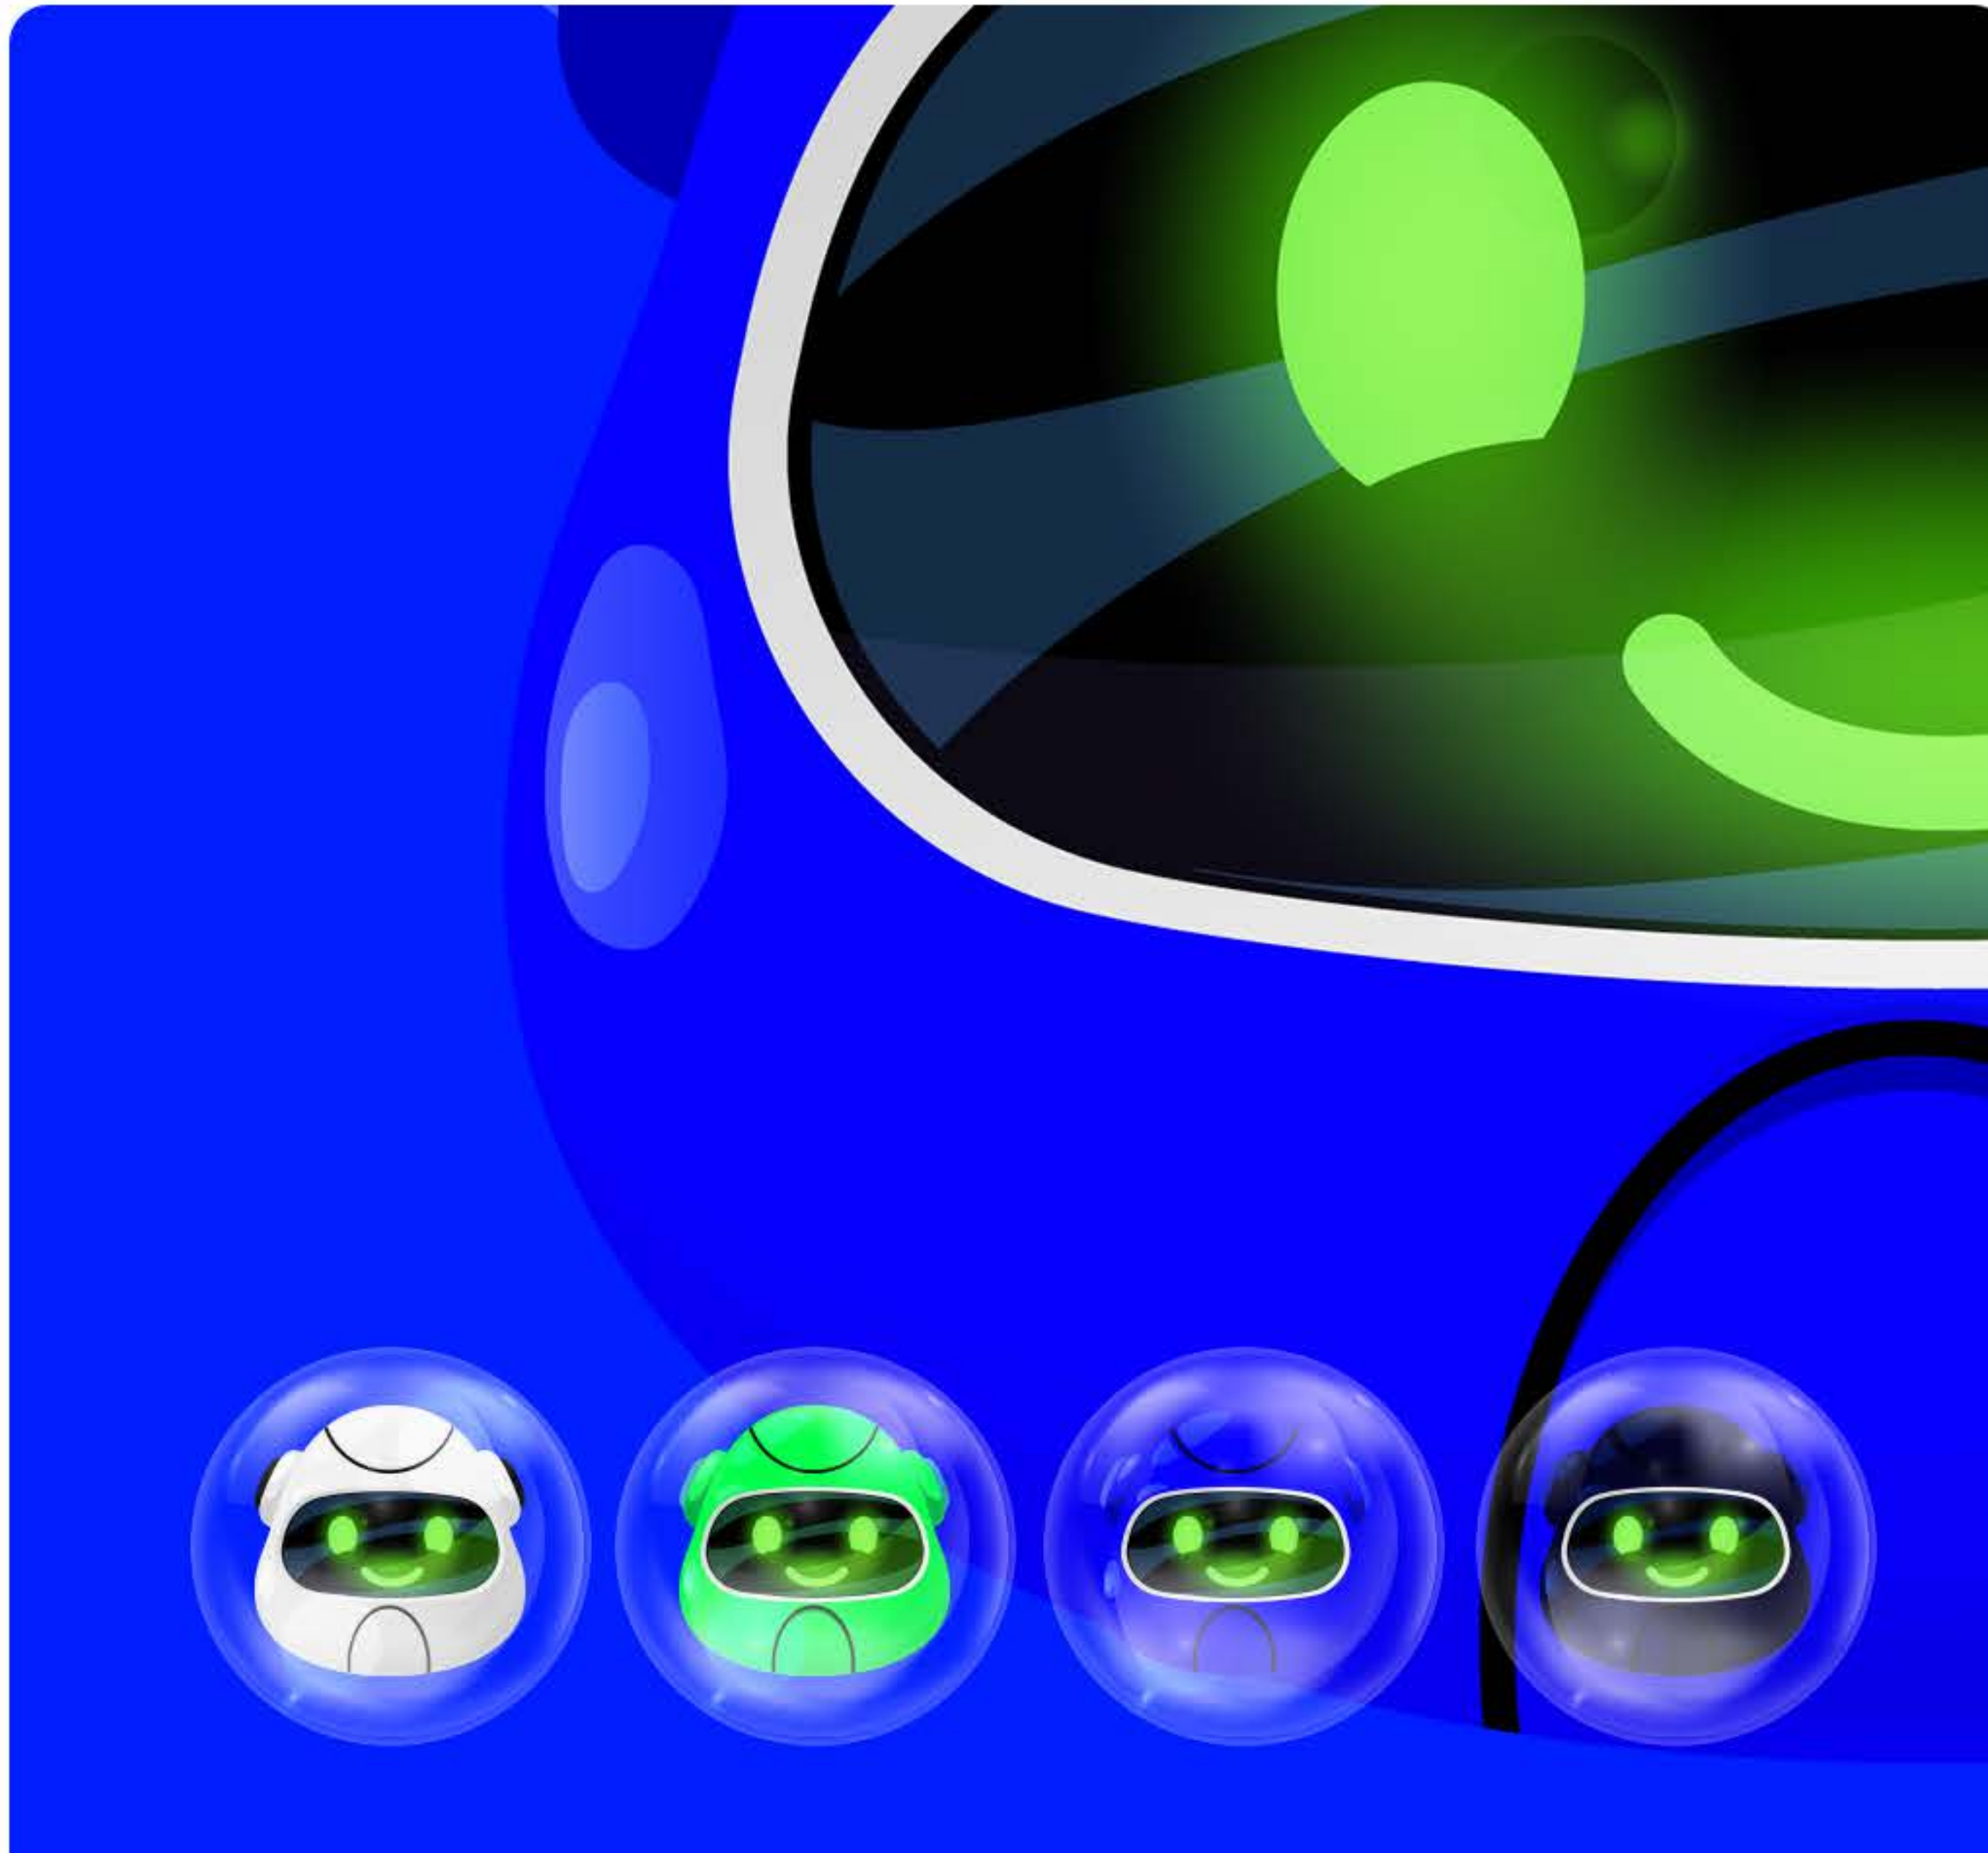

# DEXTRO AI TRADING BOT PACKAGES

Your Pathway to Profit.

# Dextro AI Trading Bot Packages

Your Pathway to Profit.

One of the essential aspects of subscribing to a Dextro Bot is choosing a suitable Bot that best suits your investment goals and risk comfort level. This is ultimately chosen based on investment power, however, in choosing a Bot there are also a few considerations as with one Dextro Bot account, a subscriber can choose to have multiple trading Bots with varying amounts, with each working independently but ultimately adding to your general profit or loss count.

Hence, it's entirely left to the subscriber to decide how they intend to deploy each Bot in terms of their trading capital and when they intend for the Bot to trade or not to trade. Each Bot is designed to deliver optimal performance within its specific tier.

# Dextro AI Trading Bot Packages

Your Pathway to Profit.

Rookie | AI

**0.5 - 1% daily profit**

Starter Bot (Generation 2 AI Bot)

**Purchase \$100 - \$4,999**

**Bot Risk Efficiency Low risk**

**Trading Duration 6 Months**

Intermediate | AI

# Dextro AI Trading Bot Packages

Your Pathway to Profit.

## Key Takeaways:

- ◆ Start your investment journey with an accessible minimum of just \$100.
- ◆ Experience daily profit potential ranging from 0.5% up to 2%.
- ◆ Choose between any of our reliable Generation 3 AI Bots for consistent low to medium risk returns.
- ◆ Our Bots offer 6-month or 12-month trading durations, providing flexibility for your investment strategy. After each trading duration, a new subscription would be required to get a new Bot and resume a new trade cycle.

# How do I get started on Dextro Bot?

Beginning your journey with us

### Step 1: Register Your Account

Visit our website at [www.dextroBot.ai](http://www.dextroBot.ai) and click on the 'Sign Up' or 'Get Started' icons. You'll be directed to a secure sign-up page.

#### Security Note:

Your password must contain one uppercase letter, one number, and one special character for enhanced security. We also offer 2-Factor Authentication (2FA) using an authenticator app of your choice for an extra layer of protection – highly recommended!

A verification email will be sent to your registered address (check your spam if not received). Click the 'verify email' link to activate your account.

### Step 2: Complete Your Profile & KYC (Know Your Customer)

It's essential to update your profile information in order to complete our seamless KYC procedure when needed. This helps us secure your account, prevent fraud, and ensure compliance with anti-money laundering regulations.

#### KYC Process:

Submit the front and back copies of your ID (Driver's Licence, National ID, or International Passport) on some occasions a proof of address (utility bill or bank statement) might be required if the ID proves insufficient to confirm identification.

Our team of security experts typically review documents within 1-2 business days, notifying you via our support email of your KYC status.

### Step 3: Fund Your Account

Log in to your dashboard and navigate to the Deposit section.

Select your preferred digital currency and you'll be provided with your own exclusive wallet details. Copy the wallet address or scan the QR code to send the asset to your DextroBot wallet.

Once you complete the deposit into your DextroBot wallet, your account will be automatically updated. The entire process would usually take a few minutes to complete.

There are 10 different wallet options to use for your deposit including Bitcoin, Ethereum, Tether, Solana and more. Check through all the wallet options to pick your preferred wallet.

You can generate a wallet for any and all the available wallet options.

#### Important:

Copy the exact address details or scan the barcode carefully.

Each account has a unique payment address; always verify it's the correct one. Contact our support team for any doubts.

### Step 4: Activate Your Trading Bot

Visit the 'Trading Bots' section of your account and browse our available Bots.

Purchase the Bot that aligns with your intended investment amount. You can purchase many different bots, and can have multiple of the same or different Bots at the same time which is important to note as there is NO option of topping up on the trading amount originally assigned to a specific Bot.

Once purchased, the Bot's trading amount remains fixed for the duration of the Bot's trading cycle.

#### Kindly Note:

- ✦ Depositing funds into your account does not automatically start trading. You must purchase a trading Bot to activate trading activities.
- ✦ Once purchased, you can view all Bot operation details in the 'My Bots' section, including capital trading amount, profit count, number of traded days, and trading results.
- ✦ Bots are currently free to purchase, but a one-time purchase fee or monthly subscription fee would be introduced in the future.
- ✦ Your Bot will trade for its stipulated duration (6 or 12 months), after which it will expire. If you wish to continue, you'll simply purchase a new Bot.

# Managing Your Earnings: Withdrawals & Rewards

Accessing Your Profits & Benefiting  
from Our Affiliate Program

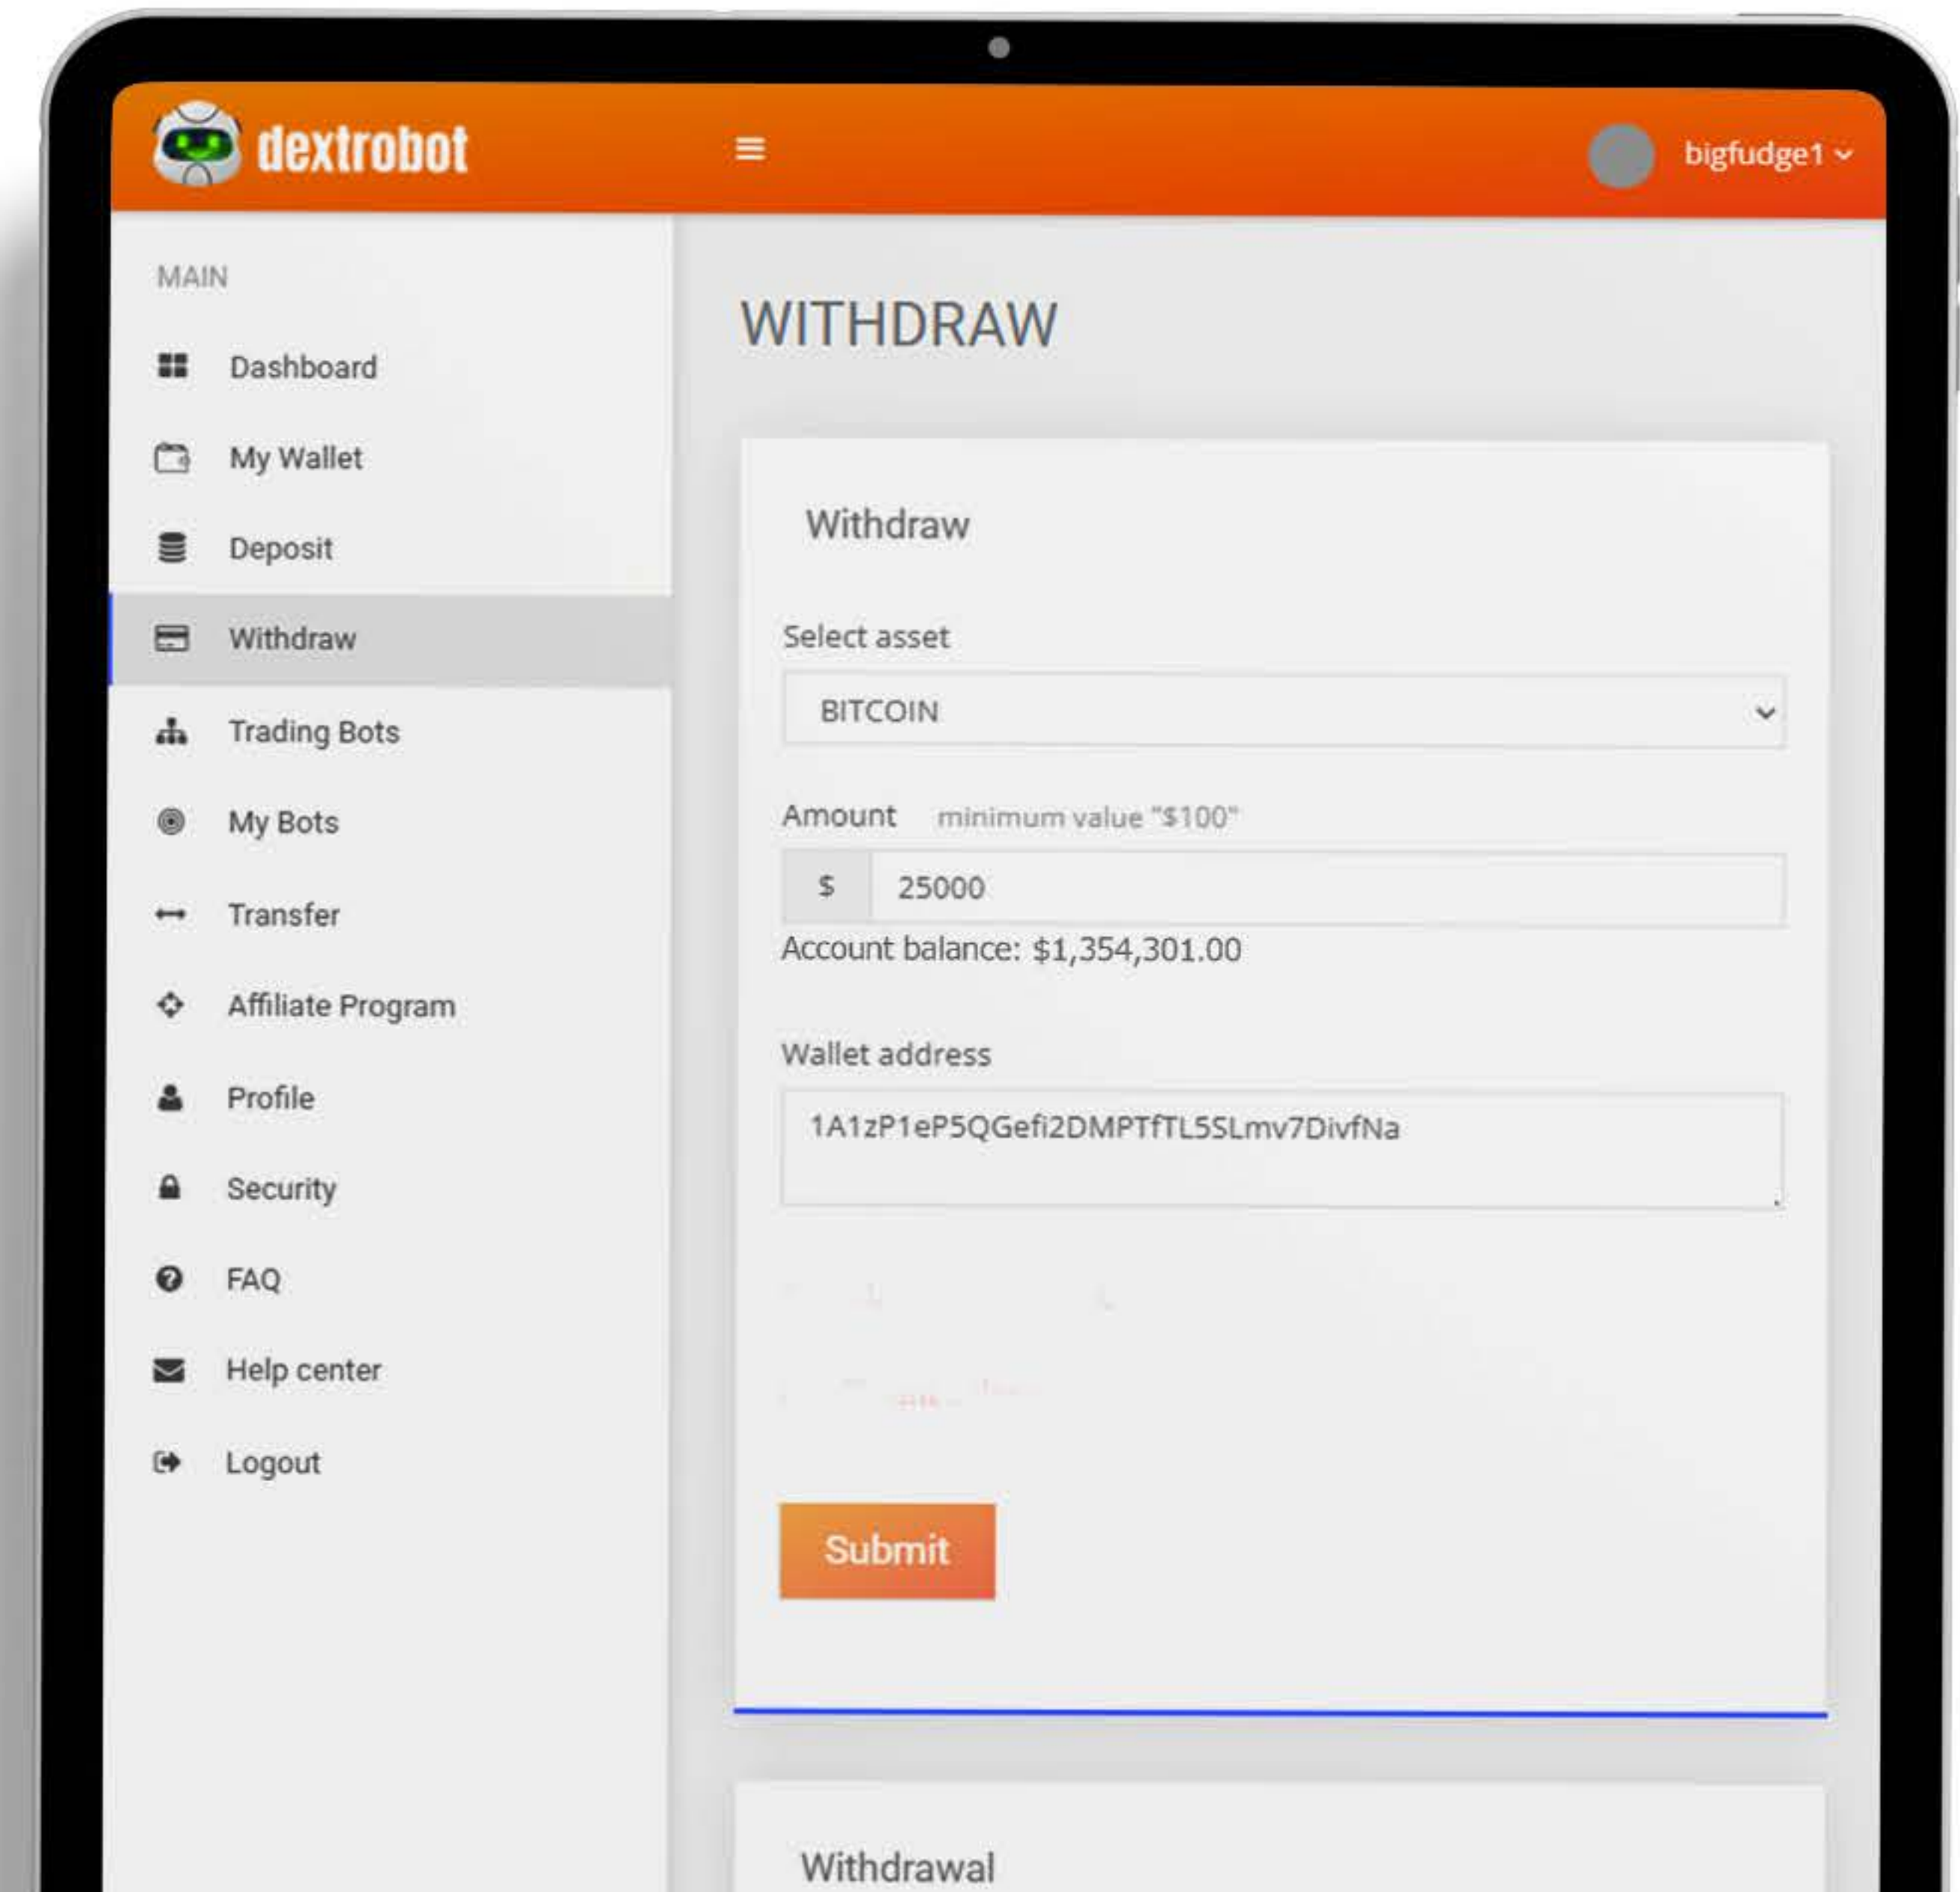

# Managing Your Earnings: Withdrawals & Rewards

Accessing Your Profits & Benefiting  
from Our Affiliate Program

## How to Withdraw Your Earnings:

- ✦ Withdrawing your earnings, whether from trading profits or referral bonuses, is quick and easy.
- ✦ Navigate to the 'Withdraw' section of your dashboard. Select the digital currency for payment, input your correct wallet address (ensure accuracy to avoid rejections), enter a valid amount (to the nearest 10), and submit your request.
- ✦ Transactions are typically completed in a few minutes to within an hour. You'll receive an email notification upon completion, and the transaction will reflect in your withdrawal history. Contact our support team for any delays.

# Transfers

**The easiest way to move assets**

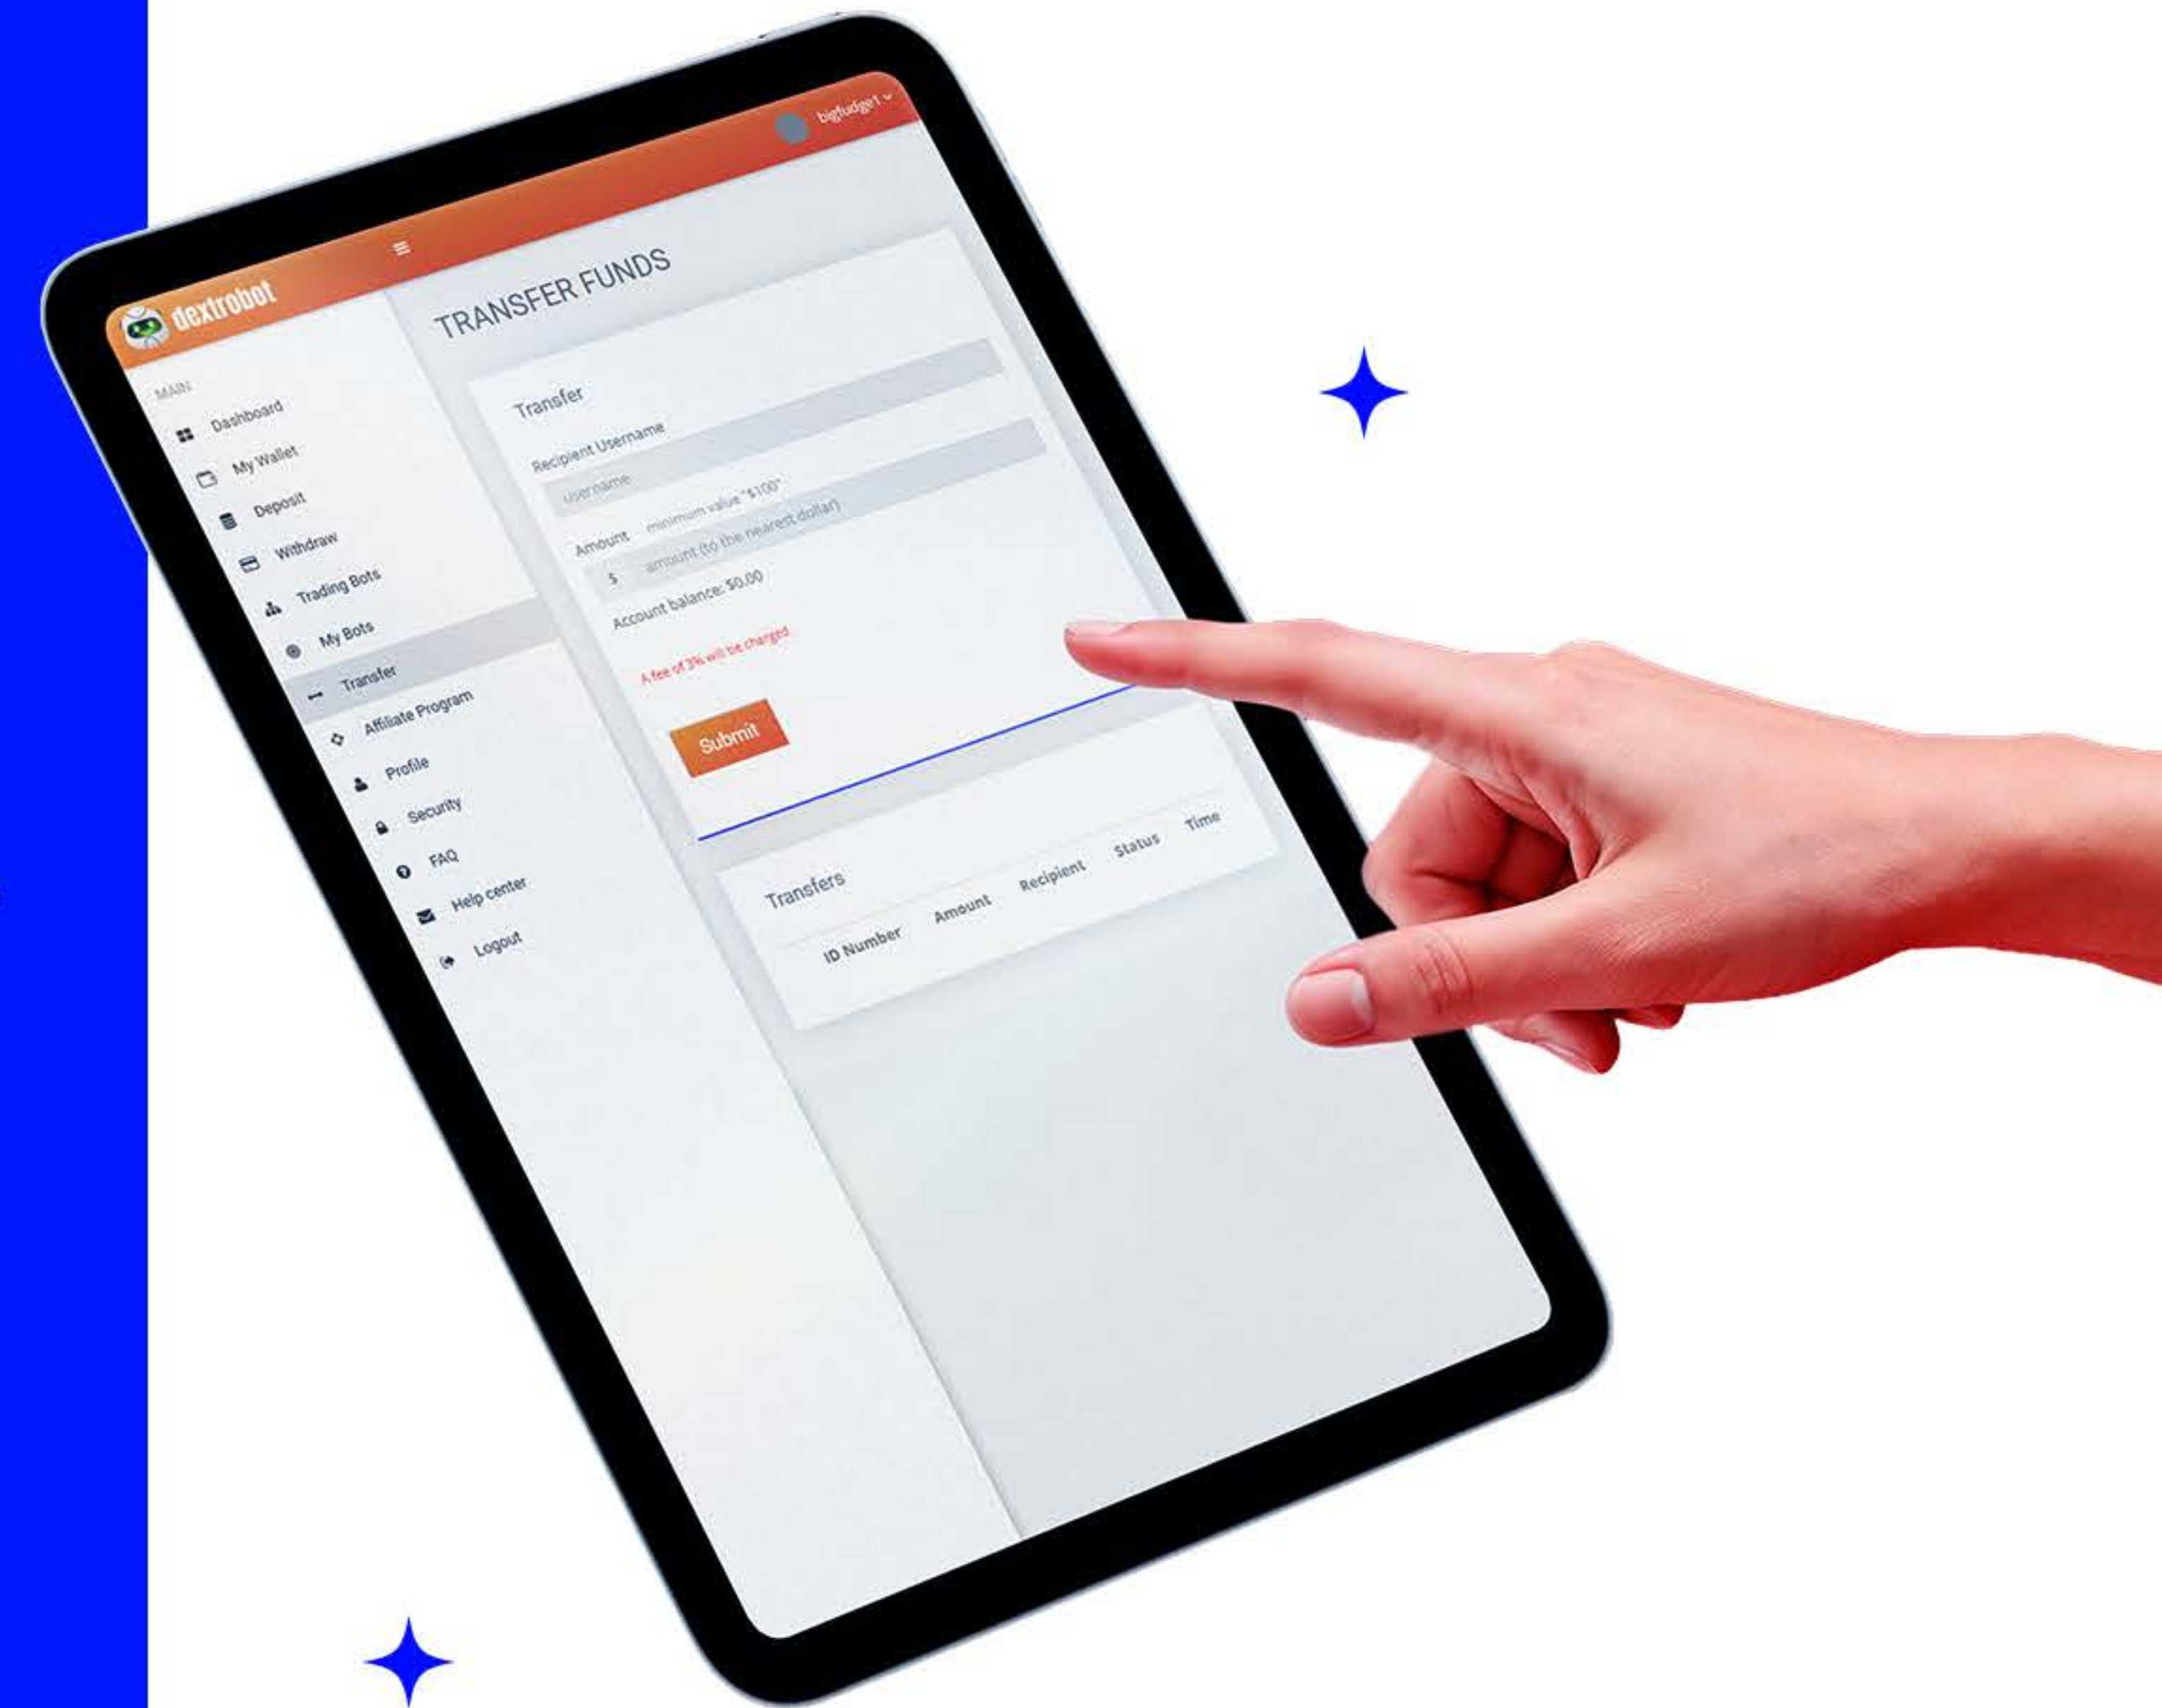

**between Dextro Bot subscribers**

Dextro Bot offers a seamless transfer option that allows account holders to transfer assets across Dextro Bot accounts simply by inputting the account email as registered on the trading account.

This transfer comes with a fixed charge and usually completes within a few seconds if verification (via 2FA) is completed.

This allows Dextro Bot users to transfer coin assets between themselves without the farce of delayed transactions due to blockchain network congestion etc. Using Dextro Bot transfer application ensures you never send assets to a wrong address as the system quickly identifies if a wrong email address has been inputted and it rejects the transaction allowing you to make the much-needed corrections before sending out.

However, users are advised to always ensure a correct email is inputted as if there's a correct email match within the system, the transaction is bound to go through.

**In a case of a wrong transfer, kindly reach out to the support team to get help in reversing or appending the transaction if required.**

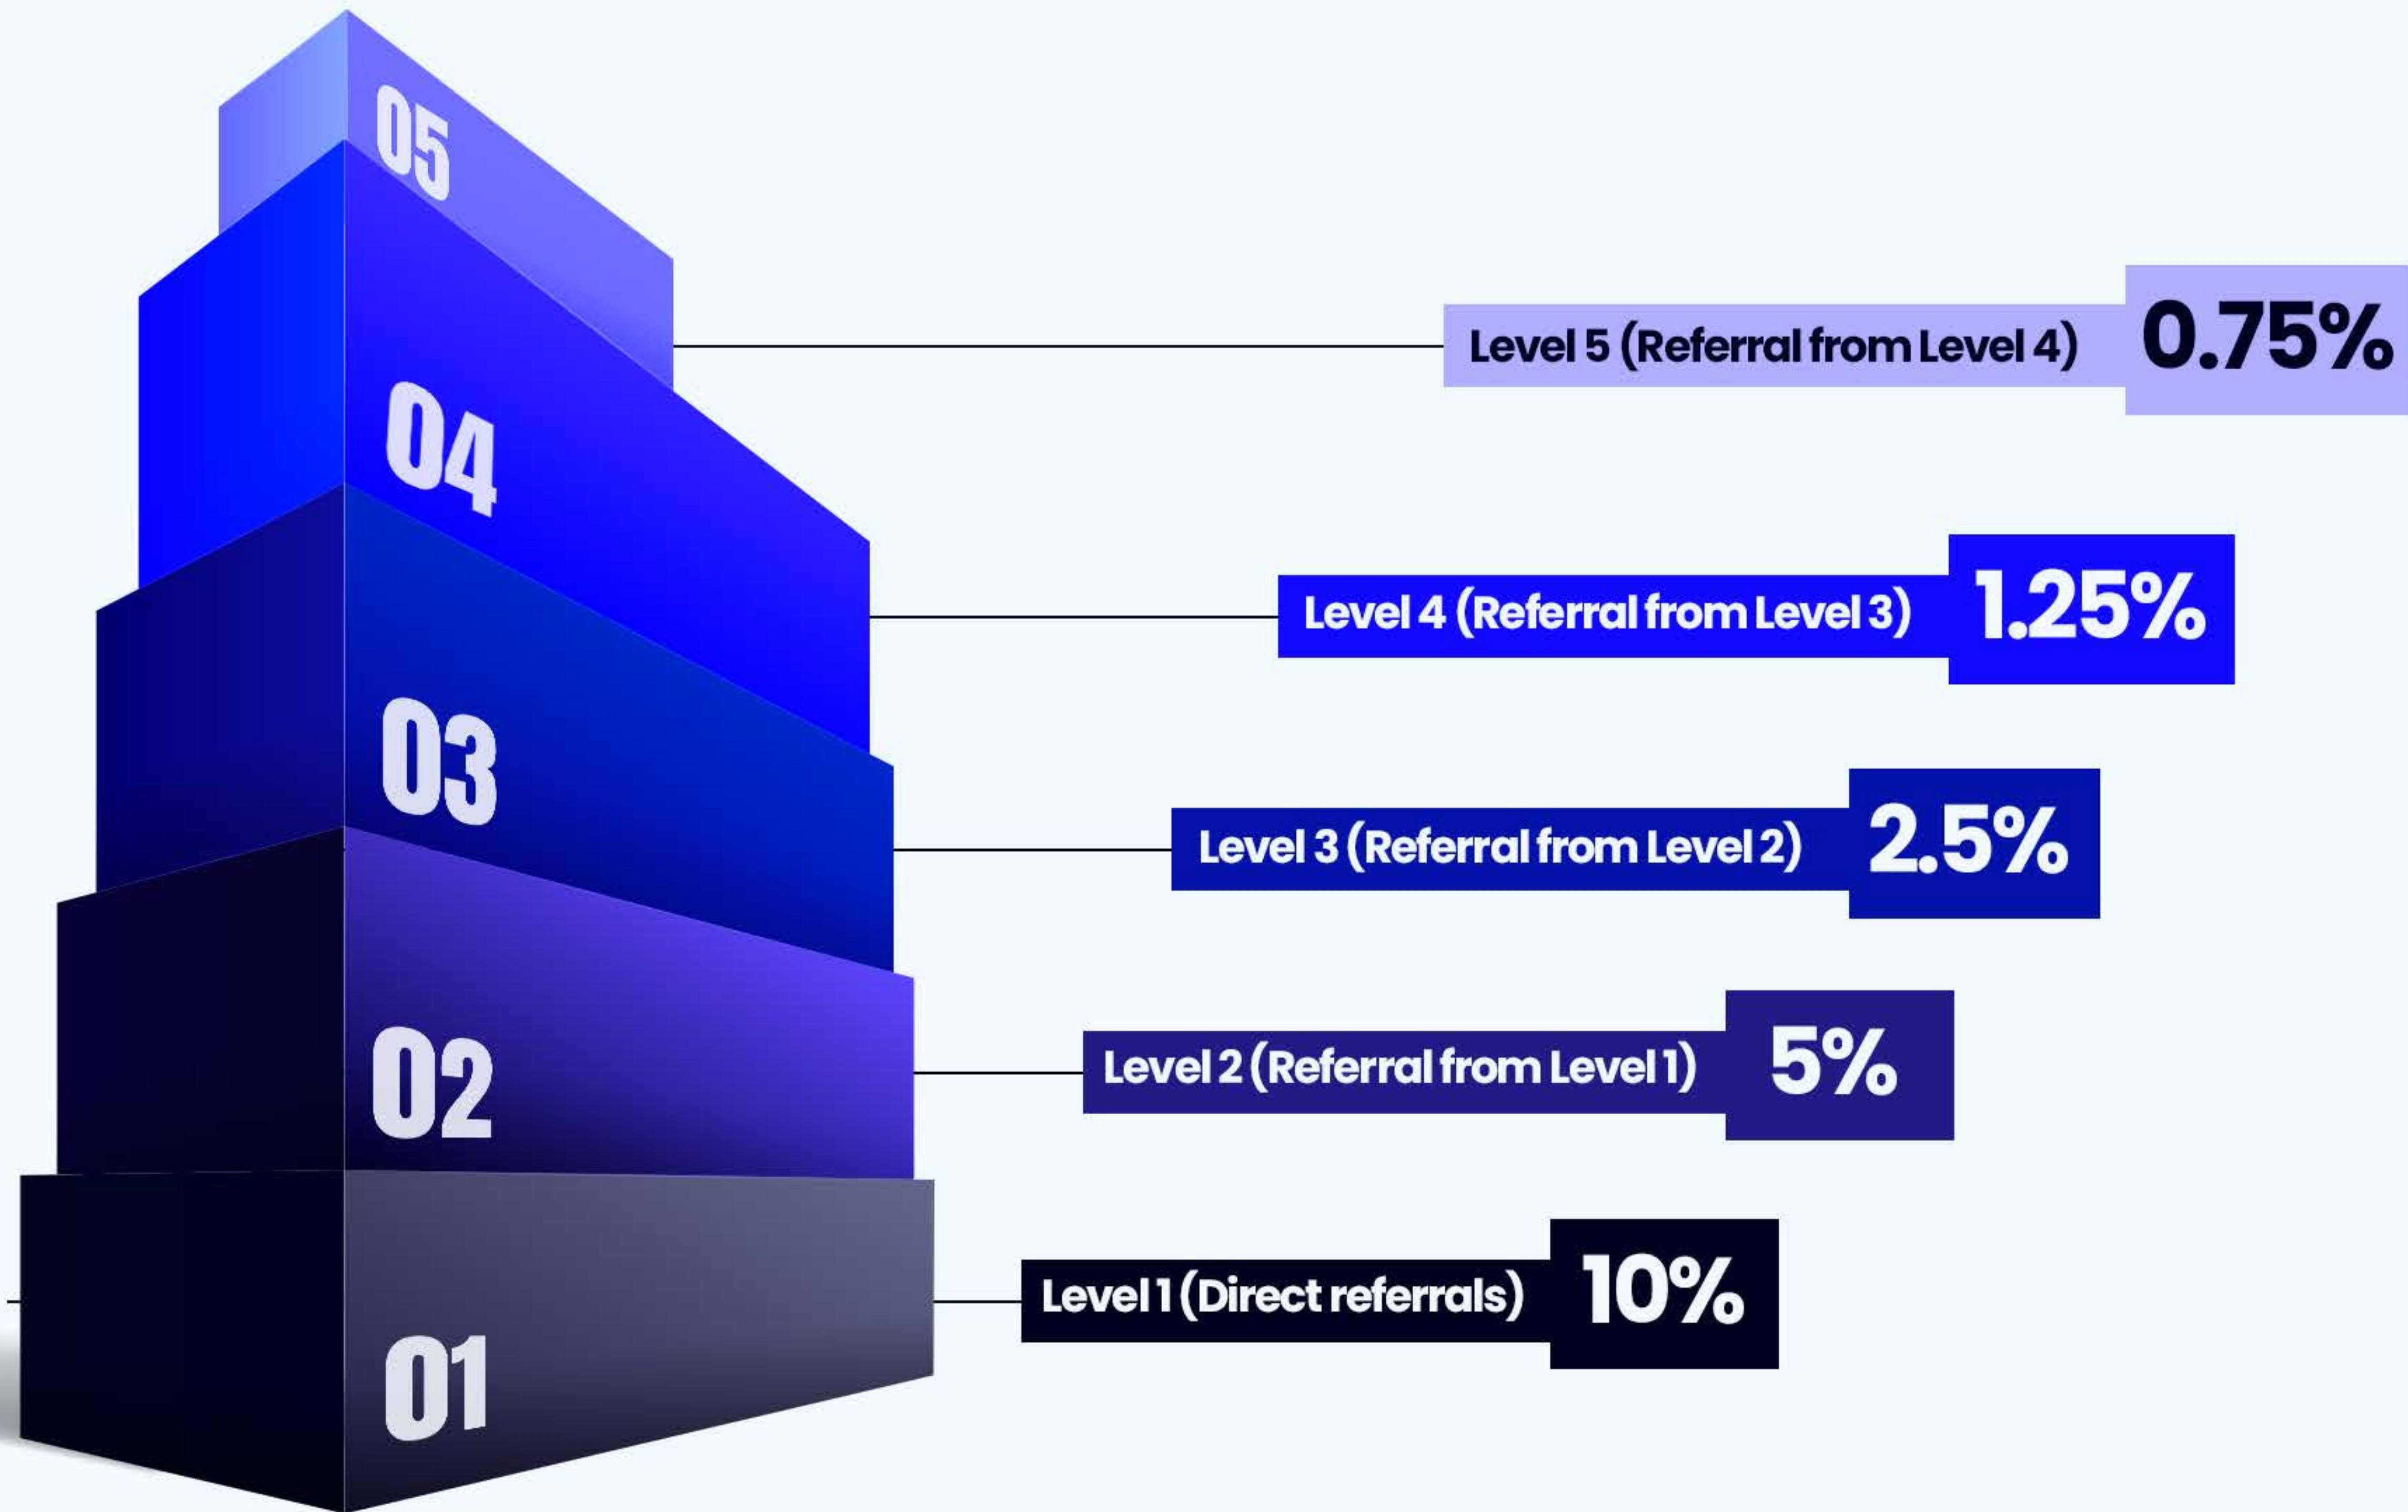

# The Dextro Bot Affiliate / Referral Program

Unlock additional earning potential with one of the most sophisticated and rewarding multi-level referral programs in the industry. Earn significant profit by referring new traders and continue to earn percentages when your referrals bring in new users, up to 5 levels deep!

# Referral Bonus Structure:

# Affiliate Tiers & Exclusive Bonuses:

Total team rank deposit and **get a reward of \$2000**

Total team rank deposit and **get a reward of \$15,000** one-time bonus and a **weekly bonus of 1%** for every new weekly deposit on all 5 referral levels

Total team rank deposit and **get a reward of \$4000**

Total team rank deposit and **get a reward of \$30,000** one-time bonus and a **weekly bonus of 0.5%** for every new weekly deposit on all 5 referral levels

# ★ SECURITY, TRANSPARENCY & FUTURE OUTLOOK

★ Your Security, Our Priority.  
Shaping the Future of Finance.

# How Safe Are Your Earnings and Deposits?

Your deposits and earnings are securely stored on the blockchain network, ensuring high levels of safety and reliability. You can track your earnings via your Dextro Bot dashboard and verify deposit completions directly on the blockchain.

We highly recommend activating 2-Factor Authentication (2FA) via the 'Security' section of your dashboard for an extra layer of protection against unauthorized access.

In the unlikely event you suspect your account has been compromised, contact our 24-hour website live chat support immediately for swift action.

## Charges & Fees:

- ✦ Trading on Dextro Bot comes with no hidden charges. Trading commissions and taxes are deducted before profits are uploaded to your account. All deductions are shown on the trading result page, to ensure you're aware of any additional deductions
- ✦ Please note that deposits, transfers, and withdrawals may incur slight charges, typically ranging from 5-10% depending on account type, transaction time, and network traffic. These will be clearly communicated at the point of transaction.

# Looking Forward

**Our Vision for the future.**

We are actively working to upgrade our mainframes and servers to accommodate a 24-hour, 7-day trading cycle in the nearest future which would see trades happen all day every day.

*This would see weekly profits increased with trades happening every day of the week.*

We are also working on introducing a "hyper-trade" feature for every Bot, which ultimately gives subscribers control to accelerate trading speed and increase daily profit when market conditions are remarkably favourable.

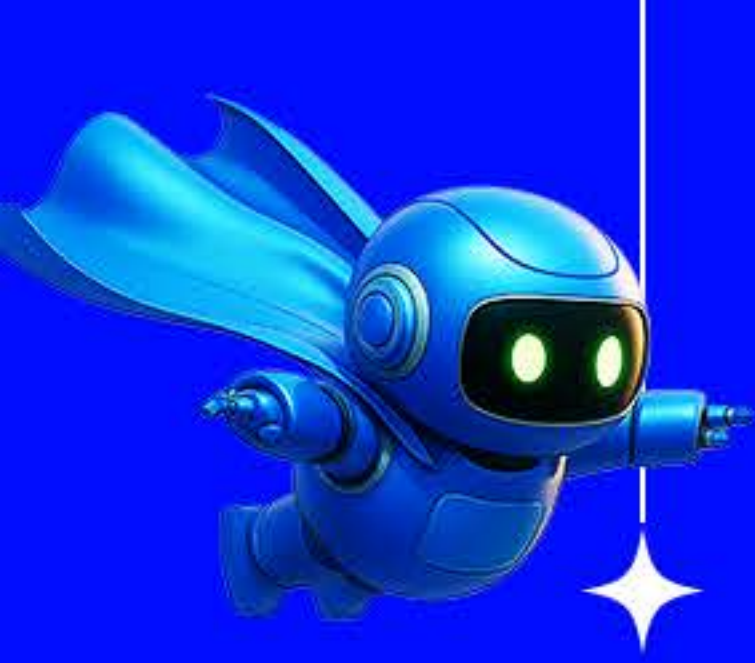

*More details on this to come*

Our ambition extends beyond cryptocurrency. Dextro AI Trading Bot will be further enhanced to capitalize on several other digital markets, including Forex, Stocks, and more.

*Given its core mechanics, it isn't in any way unforeseeable to have Dextro Bot trade stocks, forex etc.*

## Upcoming Downloadable Bot (Q1 2027):

Get ready for personalized control! Dextro AI Bot will be available for download on PCs and Laptops globally (on all major operating systems) on or before the first quarter of 2027.

This will come with a one-time purchase fee and monthly subscription. Advanced traders would also have the option of purchasing DextroBot hardware trading device which would feature a plugin device to perform even more complex trades together equipped with a hard wallet for asset storage following trades for even better security. More details to be released in our upcoming coin and product whitepaper.

*Trading subscription would also be applicable for online accounts from later versions of Dextro Bot 3.0 due to be out over the course of 2026.*

## Exclusive Benefit for Current Subscribers:

If you are an active Dextro Bot account holder now, you can get the downloadable Bot for FREE and at a subsidized monthly subscription rate when it launches in 2026!

## Botcoin by Dextro (BCD) Launch:

We are also excited to announce the launch of our utility coin, 'Botcoin by Dextro', due to be launched on minor and major exchangers on or before the first quarter of 2027.

**Whitepaper.**

Further involvements and detailed insights into our technological advancements, upcoming researches and projects will be announced in our comprehensive Whitepaper, due for release in the third quarter of 2026.

**Watch this space!**

# DISCLAIMER

Dextro AI Trading Bot is an automated trading tool that is susceptible to significant market fluctuations, particularly within the highly volatile cryptocurrency market. We therefore strongly advise you to invest wisely and safely, only committing funds you can afford to lose. Cryptocurrency investments carry inherent risks and can result in the loss of capital. Past performance is not indicative of future results.

We offer financial tools and general insights to assist you in making informed decisions about allocating and investing your funds. Please note that any insights provided are general in nature and do not constitute personalized financial advice, hence it is within your prerogative to seek expert financial advice if required.
